

SMART Meeting Pro™ software vs SMART Notebook™ software

	SMART Meeting Pro™ collaboration software	SMART Notebook™ collaborative learning software	Meeting business needs
Target audience	Meeting participants in a corporate environment	Compulsory education	SMART Meeting Pro is a collaboration and meeting productivity software package that inspires organisations to innovate, enhance teamwork and drive productivity. SMART Notebook is a compulsory education teaching tool used to deliver and manage lessons in a classroom environment.
Corporate interface	✓	✗	An intuitive, easy to use interface designed specifically for meeting environments that encourages use, drives adoption, and ensures users and presenters are not intimidated by irrelevant, complex options.
Unbound whiteboarding	✓	✗	Gives users an unlimited workspace in which to make notes, capture ideas and manipulate content. Users can experience natural and smooth manipulation of digital content, and work with large amounts of data, making for a much more creative and dynamic way of working.
Exchange integration	✓	✗	Send a meeting invite direct from Microsoft Outlook and ensure instant access to documents, attendee information and meeting details sent in the invite – without even connecting a USB or laptop. By embedding the solution into the core of the IT infrastructure, organisations can ensure the technology is utilised at every meeting.
Unified communications and collaboration (UCC)	✓	✗	SMART Bridgit conferencing software, integrated into SMART Meeting Pro, automatically sets up a meeting, generates a password, and sends invitations to participants via email, allowing remote members to be fully involved in the meeting. SMART Meeting Pro can be integrated with other UCC solutions such as Microsoft Lync and is interoperable with WebEx and Adobe Connect to ensure simple integration into existing infrastructure, investment and meeting practices.
Multi-boarding capability	✓	✗	Users can simultaneously write as well as share content and applications on up to 16 connected interactive displays from the same meeting room computer, maximising participation from everyone in the room.

Corporate gallery templates	Corporate resources, templates, backgrounds, images ✓	Compulsory Education resources, templates, backgrounds, images ✗	Build out customised Business Galleries using your company's templates. Organise your custom galleries using custom folder names and export them for deployment and use with other SMART Meeting Pro installations throughout your organisation. There's no need to re-create complex templates, saving time whilst also making sessions more engaging.
Distribution function	✓	✗	Instantly share meeting notes with all participants by emailing directly from the SMART interactive display, reducing administration time and increasing meeting productivity.
Meeting progress bar	✓	✗	Elapsed meeting time is shown by a visual indication in the built-in meeting bar. Pop up notifications indicate when the meeting time is running out. This feature ensures delegates can keep to time and improves meeting efficiency.
Extend meeting function	✓	✗	Ensures maximisation of meeting resources by allowing users to see whether meeting rooms are available, and allowing them to book resources with the touch of a button.
End meeting function	✓	✗	With the touch of a button, users can quickly end their session and be assured that confidential information is not accessed by the next meeting room users.
First for industry specific software integration	✓	✗	A variety of common vertically aligned software programmes are integrated with SMART Meeting Pro*. This enables users to utilise multi-touch, gestures and inking directly with the applications they use every day. SMART's Enterprise Ecosystem ensures optimised experiences for key industries and vertical markets such as Architecture, Engineering and Construction for Building Information Modelling (BIM), design review and project management. This enables organisations to introduce full meeting room solutions for particular applications and processes. The compatible software includes Autodesk, Adobe, SolidWorks, Tekla BIMSight, Revit and iObeya.
SMART Meeting Pro Personal Edition	✓	✗	Completes the SMART meeting experience and offers freedom and flexibility to easily collaborate from anywhere. Connect a PC or MAC to any SMART display, ensuring you're fully prepared before a meeting and can carry on working after the meeting.
GoWire auto-launch cable	✓	✗	Allows users to instantly connect their laptop to auto launch the SMART Meeting Pro Personal Edition software and product drivers to begin working before they enter the meeting.

*Some programmes require an additional plug in product
